The Children's Museum of Indianapolis staff along with local educators and university professionals collaborated to create engaging, K-8 standards-based online activities and WebQuests. There are eight activities for K - 2, divided into nonreader, early reader, and reader categories. There is also a WebQuest for grades 3 -5, as well as one for grades 6 - 8. Each activity has a teacher's guide including activity overview, standards and suggestions for variations, when applicable.

Teachers  SCHOLASTIC

Grades K-8: This project is designed to offer students a rich environment of standards-based skills steeped in fun technology-based activities. Students explore dinosaur-related content as they find out about a recent dinosaur discovery, study the characteristics of some better-known dinosaurs, classify dinosaurs using a time line, craft questions to a dinosaur expert, and use prior knowledge to answer fun and interesting questions about dinosaurs.
