

# Busy Teacher Resources

January 5, 2004

Happy New Year!

<http://www.gdbdp.com/multiflyer/>

Multiflyer is an online game help anyone who is learning multiplication tables. It's a fun game that takes place in space and even sprinkles in learning about some of the planets. You can play it online, or register to receive a full downloadable version as well as downloadable interactive support tools.

<http://www.thinkport.org/>

Thinkport has lots of digital classroom resources (from PBS and other high-quality sources), lesson plans, activities, and interactive electronic field trips. It also offers professional development courses for teachers, technology tutorials, and some great tools for building classroom websites and customizing projects on the web.

Teachers can sign up for free and get an electronic Idea Box to save everything digital. Teachers in Maryland have praised it (it was developed over a 2-year period with teachers and educators for real hands-on usefulness) and the U.S. Dept of Education has called it "a model for other states."
