SCIENCE FUN

The Miami Museum of Science developed this creative website to provide educational activities dealing with energy. Activities for grades 4-12.

Balloon Molecules

Modeling balloons are known first of all as a toy or in form of balloon sculptures. But there are other possibilities... On this web site we would like to show you how to use modeling balloons to **build chemical molecules**. Basically you only need balloons, a pump and some imagination. The knots you need are shown here.
