### Access Excellence: The Mystery Spot

Great online and offline activities that allow you and your students to solve mysteries using science. Find out what happened to the local frog population, explore Arctica, or use a microscope to solve a mystery. These fourteen activities are designed to show science in a whole new light.

The NASA Why? Files is a U.S. distance learning initiative that integrates the use of a television broadcast, web site, and educator's guide. The project uses Problem-Based Learning to introduce students in grades 3-5 to NASA research and missions. The television broadcasts (or videotapes) and web site provides students with the opportunity to learn subject matter and develop problem-solving skills while engaged in real-world problems.
