## WhoWhatWhen Interactive Historical Timelines

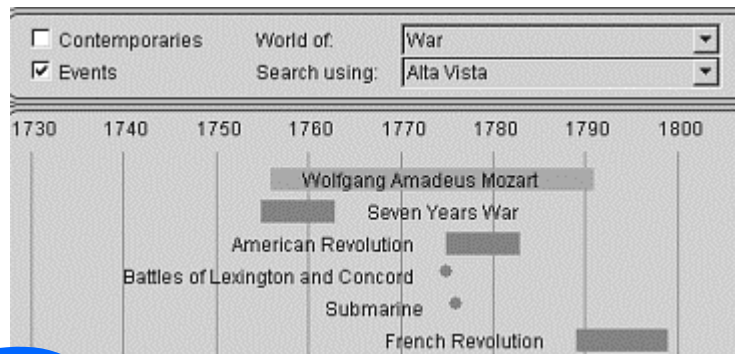

<http://www.sbrowning.com/whowhatwhen/index.php3>

**WhoWhatWhen** is a database of people and events from 1000 A.D. to the present. Create graphic timelines of periods in history and of the lives of individuals.

*Examples:*

- Who was alive and what was happening [in 1776?](#)
- Who was born/died [on December 25th?](#)
- Which wars were being fought [during Mozart's lifetime?](#)

Sample of Java Timeline for Mozart:

If you teach American geography, or if you're an armchair adventurer you've come to the right place. Hitch a ride in our "virtual backseat" as we travel America in our RV, "Harvey the RV," and share this exciting journey through the window of an electronic postcard.

Sign up today to receive your FREE "Live-at-the-Scene" postcards delivered to your mailbox every week from our second road trip, the "Wild Side of America," which begins October 14, 2002. Every Tuesday you'll receive a postcard directly in your mailbox featuring scenery or wildlife from each state.
