Dear Parents,

September 18, 2017

Each year we review the academic progress of all of our students. During this review, students are identified who have demonstrated a need for extra attention in a subject area. This review includes classroom grades, PARCC results, and teacher input. As you are probably aware, there is continued emphasis to evaluate and address our students’ progress and performance. In an effort to meet the needs of our students and to meet the goals defined by the state, Lincoln Park Elementary School has reviewed your child’s academic progress, and s/he has been identified as a student who could benefit from Basic Skills Instruction in: Reading/Language Arts [ ] Mathematics [ ].

Our Basic Skills teachers have developed a program that addresses the specific needs of each student, based upon the areas of weakness identified on last year’s tests and classroom performance. It is our hope that with this more focused approach we will be able to meet the individual needs of your child. This will also enable your child to find greater success in the classroom and on state assessments. Your child’s program is described below:

<table>
<thead>
<tr>
<th>Reading/Language Arts</th>
<th>Math</th>
